SPECIALIZED TOOL KIT P/N 14T1001

For AN/PVS-14 night vision goggles

As the leading supplier of night vision solutions, it should come as no surprise that ASU has extended its line of products to include a Specialized Tool Set, P/N 14T1001, for the AN/PVS-14 night vision systems. This portable, efficient tool set is designed to provide the night vision goggle (NVG) maintainer with the tools necessary to disassemble and reassemble monocular night vision devices.

FEATURES AND BENEFITS

- Portable
- Hex driver for removal/replacement of upper and lower housings
- Hex wrench for ONI OFF/IR switch-knob setscrew
- Eyepiece lock-ring torque driver
- Objective lock-ring hex wrench
- Tube-retainer torque driver
- Close-focus lock-ring wrench
- Crimp Tool

Military maintenance personnel are periodically required to perform Preventative Maintenance Checks and Services (PMCS) on night vision equipment. This tool set will simplify the disassembly and reassembly of the AN/PVS-14 monocular night vision devices both in maintenance facilities and in the field. The torque drivers in this tool set are factory calibrated to the torque values proven by goggle manufacturing processes to provide the best lock ring and tube retainer ring tightness without overstressing.

Export of this product is regulated by U.S. Department of Commerce, Bureau of Industry and Security, EAR, Title 15, Chapter VII, Subchapter C, Parts 730-774 .

INNOVATION FOR A SAFER TOMORROW
